Course Objective

Common Core Standards

- Know that there are numbers that are not rational, and approximate them by rational numbers.
- Work with radicals and integer exponents.
- Understand the connections between proportional relationships, lines, and linear equations.
- Analyze and solve linear equations and pairs of simultaneous linear equations.
- Define, evaluate, and compare functions.
- Use functions to model relationships between quantities.
- Understand congruence and similarity using physical models, transparencies, or geometry software.
- Understand and apply Pythagorean Theorem.
- Solve real-world and mathematical problems involving volume of cylinders, cones, and spheres.
- Investigate patterns of association in bivariate data.

Class Expectations

- Be Respectful. Your teacher, your classmates, yourself, and property.
- Complete work, work and let work.
- Be attentive to directions and demonstrations.

I also expect you to follow our school-wide expectations of PAWS:
